# Case Study: A Leading Regional Liquidity Provider

## A Complete Cloud Transformation from GCC to Commercial — Built to Power AI Adoption

**1,249**
Identities & User Accounts Migrated

**12,051 GB**
Mailbox & Content Data Migrated

**621**
Devices Re-Enrolled Across 3 Platforms

**ZERO**
Regressions in Security or Compliance

## Executive Summary

A leading regional liquidity provider needed to move beyond a legacy cloud environment that could not support Microsoft Copilot, Microsoft Fabric, or its broader ambitions to drive enterprise AI adoption and a unified data platform. The provider engaged Teton Cloud to lead a complete transformation onto a modern, commercial cloud foundation — delivered with zero disruption to operations and no compromise to security or regulatory compliance. The provider is now positioned to adopt AI-driven innovation across the enterprise.

## Business Outcomes

- **AI-Ready Foundation:** Unlocked Copilot, Fabric, AI agents, and a unified data platform.
- **Complete Tenant Migration:** 1,249 identities and 12,051 GB moved to commercial Microsoft 365.
- **Automation-Driven Delivery:** Automated discovery and validation cut migration risk enterprise-wide.
- **Enterprise-Wide Alignment:** United DevOps, Cloud, Security, and IT under one strategy.
- **Compliance & Security Preserved:** Zero regression in regulatory or security posture.
- **DevOps & App Continuity:** Zero disruption to business-critical apps and pipelines.
- **Voice Services Restored:** 314 users migrated with full E911 compliance.
- **Azure & Power Platform Continuity:** 8 subscriptions and 258 flows migrated seamlessly.
- **GCC Tenant Retired:** Eliminated dual-licensing costs and legacy complexity.

## Strategic Drivers

- Drive enterprise AI adoption by moving off a GCC tenant that could not support Copilot and AI agents
- Complete a full technology transformation without compromising regulatory compliance
- Preserve identity, security, and governance controls throughout a high-stakes migration
- Restore full voice and collaboration functionality with no disruption to provider operations
- Eliminate the cost and complexity of maintaining a separate GCC tenant

> *Teton Cloud served as the provider's strategic transformation partner, combining Microsoft 365, Azure, identity, and compliance expertise to complete a full migration off GCC and position the provider to adopt Microsoft Copilot and AI-driven innovation.*
